

Job Description: Head of Data Engineer

Department: Data Engineering

Reporting Structure: Reports to Chief Technology Officer

Summary:

We are seeking a highly skilled and experienced Head of Data Engineer to lead our Data Engineering team. The ideal candidate will be responsible for overseeing the design, development, and implementation of our data infrastructure and systems. This role will play a crucial part in driving data-driven decision making and ensuring the accuracy and reliability of our data processes.

Responsibilities:

- Lead and manage a team of data engineers to deliver high-quality data solutions
- Design and implement scalable data pipelines and ETL processes
- Collaborate with cross-functional teams to understand data requirements and deliver solutions
- Ensure data quality and integrity across all data sources and systems
- Stay current with industry trends and best practices in data engineering

Qualifications:

- Bachelor's degree in Computer Science, Engineering, or related field
- 5+ years of experience in data engineering or related field
- Proven experience in leading and managing a team of data engineers
- Strong knowledge of data warehousing, ETL processes, and data modeling
- Proficiency in SQL, Python, and other relevant programming languages
- Excellent communication and problem-solving skills

Benefits:

- Competitive salary and benefits package
- Opportunity for professional growth and development
- Collaborative and innovative work environment
- Flexible work schedule
