Job Description: Power BI Specialist

Department: Data Analytics

Reporting Structure: Reports to the Data Analytics Manager

Summary:

We are seeking a talented Power BI Specialist to join our Data Analytics team. In this role, you will be responsible for developing and maintaining Power BI reports and dashboards to provide valuable insights to our organization. If you are passionate about data visualization and have a strong background in Power BI, we want to hear from you!

Responsibilities:

- Design and develop Power BI reports and dashboards to support business decision-making
- Create data models and implement data transformations to ensure data accuracy and consistency
- Collaborate with stakeholders to gather requirements and understand business needs
- Optimize report performance and troubleshoot any issues that arise
- Stay current on industry trends and best practices in data visualization

Qualifications:

- Bachelor's degree in computer science, Information Systems, or related field
- 2+ years of experience working with Power BI
- Strong understanding of data visualization principles
- Experience with SQL and data modeling
- Excellent communication and teamwork skills

If you are a detail-oriented individual with a passion for turning data into actionable insights, we encourage you to apply for this exciting opportunity!
